## EDUCATION

### Duke University

May 2027

*Bachelor of Science in Computer Science*

**Relevant Coursework:** Data Structures & Algorithms, Introduction to Computer Science, Computer Architecture, Intro to Statistical Data Science

## TECHNICAL SKILLS

**Languages:** Python, Java, R, C-Language, JavaScript

**Web Development:** HTML, CSS, JavaScript

**Spoken Languages:** Somali, English, Swahili

**Technologies:** Git, PyCharm, VS Code, LangChain, NLTK, ChromaDB, Ollama LLM, Docker

## RELEVANT EXPERIENCE

### Software Engineering Intern

May 2024 – Aug 2024

*Duke Office of Information Technology, Code+ Program*

*Durham, NC*

- Contributed to a research discovery web app designed to match scholars, provide funding opportunities, and generate user profiles, serving over 8,000 users.
- Orchestrated the application of AI technologies, including LangChain, NLTK, and Ollama LLM, to elevate the platform's ability to intelligently match researchers and surface key funding opportunities.
- Enhanced the user experience by contributing to the design and implementation of accessible, intuitive user interfaces that ensured broad usability across multiple devices.
- Partnered closely with cross-functional teams, including academic researchers and senior engineers, to refine features based on iterative feedback, optimizing platform performance.
- Advanced team output by delivering over 6,000 lines of high-quality code, directly contributing to the successful completion of the project under tight timelines.

### Superintendent Intern

Jan 2023 – May 2023

*Kipp Columbus*

*Columbus, OH*

- Collaborated with regional directors to facilitate and enhance student-led initiatives on campus.
- Conducted a comprehensive campus-wide student survey to gather feedback and enhance student experience.
- Facilitated interviews with students and staff to gain insights into their needs and concerns, contributing to the development of effective strategies for supporting students on campus.
- Curated content from credible sources to create engaging monthly school newsletters.

### Game Master

Jun 2022 – Nov 2022

*Escape Artists*

*Columbus, OH*

- Managed and facilitated escape games, ensuring efficient operation as a game-master
- Completed game setups post-completion, providing a welcoming experience to guests, and introducing them to game rules before commencement
- Implemented and enforced safety protocols to ensure a secure and enjoyable gaming environment
- Developed comprehensive surveys to assess participant satisfaction and gathered valuable feedback to enhance overall event experiences

## PROJECTS

### Scholars@Duke Opportunities Finder | *Python, LangChain, NLTK, Ollama LLM, ChromaDB*

- Designed and implemented the AI-powered Collaboration Finder, utilizing advanced natural language processing techniques to generate embeddings with ChromaDB, ensuring accurate and meaningful researcher matches (2,200+ lines of code).
- Developed and refined the Funding Finder feature, applying Ollama LLM to sift through thousands of research topics, enabling personalized and efficient funding searches, boosting user engagement.
- Constructed and optimized the AI-driven Profile Generator, automating the creation of comprehensive scholar profiles and associated keywords, dramatically improving the platform's ability to serve researchers.
- Built and refined the front-end components, contributing over 4,200 lines of code to deliver a seamless, responsive, and highly accessible user interface, significantly improving user interaction and satisfaction.

### CleverGuessWord | *Python, Pycharm*

- Designed and implemented an innovative game feature that dynamically updates the secret word after each user guess
- Engineered two distinct versions of the game – a standard mode and a debug mode, offering users the ability to observe real-time code execution for a comprehensive understanding of the game mechanics
- Acquired proficiency in navigating and constructing multifaceted projects comprised of multiple files to ensure seamless functionality
